Ninad Rajendra Rade

Solutions Engineer | AI Integrations, Customer Discovery & Proof of Concept
New York, NY | +1 (646) 924-6376 | radeninad@gmail.com
linkedin.com/in/ninadrade | github.com/offninad | ninadrade.xyz

Education

New York University, Tandon School of Engineering — New York, NY
M.S. Computer Engineering; GPA: 3.84/4.0 — *Expected May 2027*

University of Mumbai, Fr. C. Rodrigues Institute of Technology — Mumbai, India
B.E. Computer Engineering, Honors in AI & ML; CGPA: 8.97/10 — *Jul 2025*

Experience

Boon AI Inc. — New York, NY
AI Integration & Solutions Engineer Intern, Private-beta AI startup — *Jun 2026 – Aug 2026*

- Onboarded **10+ early-adopter customers** by configuring **MCP servers** and tools in their environments and resolving deployment issues, bringing each live within **2 weeks** and unblocking the private-beta feedback loop.
- Translated customer discovery into **3 proof-of-concept prototypes** and authored integration specifications (including a **FullEnrich** evaluation) for Product and Engineering, giving founders demo-ready proof of fit for each use case.
- Ran technical demos and walkthroughs across **20+ kickoff, discovery, and feedback sessions** with founders and executives, adapting depth for non-technical audiences and converting feedback into prioritized product requirements.
- Diagnosed customer integration failures across product APIs and agent workflows and isolated each into a reproducible engineering ticket with escalation notes, cutting CS-to-Engineering back-and-forth and speeding fixes.
- Developed a **customer-health dashboard** on the product **REST API** (closing gaps in the API spec) and ran weekly reporting on activation, usage, and credit consumption, lifting engagement **15%** and driving **10+ product fixes**.
- Automated **HubSpot** contact, deal, and ticket creation from website interactions using workflows and APIs, eliminating manual data entry so sales and support worked from one accurate CRM record.

DavaNinja Pvt. Ltd. — Mumbai, India
Software Engineering Intern, Healthcare AI — *Oct 2024 – Mar 2025*

- Engineered a **Python NLP pipeline** standardizing pharmacy terminology across **100K+ clinical records**, clearing a **2-week** ingestion bottleneck and delivering clean training data to downstream ML models.
- Implemented automated schema, duplicate, and format checks against API specifications and documented **40+ test cases**, reducing manual review **40–50%** and shortening QA review cycles **30%**.

Projects

Preflight | *AI Agent Integration Readiness* — github.com/offninad/preflight

- Designed a **Python/MCP** harness assessing AI-agent integration readiness via tool discovery, read/write/destructive classification, and default-deny probe policies, so teams see what an agent can touch before go-live without changing state.
- Integrated **IBM Granite** to explain findings from probe telemetry with citation validation and deterministic fallback, keeping permissions and scoring outside the LLM so every readiness report is reproducible and auditable.
- Shipped with **Docker**, **GitHub Actions CI**, and **500 pytest tests** at **93% branch coverage**; integration tests verify from servers' own invocation logs that no destructive tool is ever called, making it usable as a CI gate.

DeepFit | *Real-Time Exercise Form Feedback* — Python, OpenCV, MediaPipe

- Built a pose-estimation application running at **30+ FPS on CPU** and trained a Random Forest on joint-angle features to **94% F1**, delivering per-repetition form feedback on any laptop without a GPU.

Skills

Solutions Engineering: Technical discovery, proof of concept (POC) development, product demos, customer onboarding, troubleshooting, integration specifications, stakeholder communication
AI & APIs: MCP, Claude/OpenAI APIs, IBM Granite, REST APIs, RAG, prompt engineering, Pydantic, Claude Code, HubSpot APIs
Engineering: Python, SQL, JavaScript, Docker, Git/GitHub Actions, pytest, Linux, AWS (S3), Pandas, Scikit-learn

Certifications

Anthropic: Claude Certified Architect – Foundations; Claude Code in Action
Databricks: Generative AI Fundamentals
In progress: IBM AI Engineering Professional Certificate; AWS Certified Solutions Architect – Associate (exam preparation)

Leadership

AIESEC in India — Mumbai, India
OC Vice President, Partnerships & Logistics — *May 2022 – Aug 2022*

- Led operations for youth-development programs serving **50+ participants** and negotiated sponsor partnerships, reporting progress to non-technical committee stakeholders so programs ran with the resources they needed.
