Ninad Rajendra Rade

New York, NY | +1 (646) 924-6376 | radeninad@gmail.com | linkedin.com/in/ninadrade | github.com/offninad | offninad.github.io

EDUCATION

New York University, Tandon School of Engineering — New York, NY
M.S. Computer Engineering — GPA: 3.84/4.0 — *Aug 2025 – May 2027*

University of Mumbai — Fr. C. Rodrigues Institute of Technology — Mumbai, India
B.E. Computer Engineering, Honors in AI & ML — CGPA: 8.97/10 — *Jul 2021 – Jul 2025*

Coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Probability & Statistics, Linear Algebra

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, C/C++, Bash

AI & Agentic Systems: LLM API Integration, AI Agent Workflows, Retrieval-Augmented Generation (RAG), Prompt Engineering, Hugging Face Transformers, PyTorch, TensorFlow, Scikit-learn, XGBoost, SHAP

Applications & Integrations: REST APIs, MCP Integrations, Streamlit, Workflow Automation

Data Engineering & Analytics: PySpark, Spark SQL, Spark MLlib, Pandas, NumPy, Data Preprocessing, Schema Validation

Tools & Platforms: Git, Linux, AWS S3, MySQL, MongoDB, Hotjar, OpenCV, MediaPipe

EXPERIENCE

Boon AI Inc. — AI Integration & Solutions Engineer Intern — New York, NY — Jun 2026 – Aug 2026

- Build and test internal and customer-facing AI applications during a private beta, integrating AI agents into customer workflows and deployed environments via REST APIs, third-party MCP integrations, and connected tools.
- Build and demo 3 product prototypes with supporting dashboards and technical walkthroughs to onboard and enable private-beta early adopters, and translate customer kickoff and Return on Experience (ROX) sessions into structured product feedback.
- Investigate and reproduce customer-side AI-agent and integration failures; document bugs, reproduction steps, and escalation notes, and coordinate with Product and Engineering to resolve customer-facing issues.
- Analyze product activation, usage, credit consumption, and workflow friction from analytics (Hotjar), preparing weekly KPI reports that inform product and roadmap decisions.

DavaNinja Pvt. Ltd. — Software Engineering Intern, Healthcare AI — Mumbai, India — Oct 2024 – Mar 2025

- Engineered Python and NLP preprocessing pipelines for 100K+ pharmacy records, producing clean, structured inputs for healthcare AI drug-classification and risk-assessment workflows.
- Implemented schema validation and statistical drift checks that cut manual review effort 40–50%, and integrated REST APIs across 3 internal services to automate ingestion and eliminate a 2-week data-ingestion bottleneck.
- Authored 40+ manual test cases for pre-release builds, reducing QA review-cycle time 30% and strengthening production readiness and reliability.

SELECTED PROJECTS

A11ySentry — Multimodal Accessibility Regression Investigator — *In Development*

- Architect a GitHub-integrated system that compares base and pull-request builds across six accessibility signals—Playwright journeys, axe-core findings, DOM snapshots, accessibility trees, screenshots, and keyboard-focus traces—to surface regressions before merge.
- Design an agent workflow with WCAG/ACT guidance retrieval (RAG) to produce evidence-backed GitHub Check findings, structured remediation suggestions, and replay-based validation, with security-conscious handling of build artifacts.

ScentGraph — Explainable ML Longevity Predictor — *Python, XGBoost, TF-IDF, SHAP, Streamlit*

- Built an end-to-end tabular ML prototype mapping user-provided fragrance ingredients and concentrations to predicted longevity; applied TF-IDF across 200+ compounds and tuned an XGBoost regression model to under 0.8 MAE hours.
- Delivered a Streamlit interface with SHAP explainability, instant inference, and user-readable feature-importance outputs that translate model predictions into understandable user value.

NYC Taxi Demand Prediction & Anomaly Detection — *Python, PySpark, Spark SQL, Spark MLlib, Streamlit*

- Engineered a distributed PySpark pipeline processing 8.8M cleaned trips from ∼10M raw records in under 3 minutes via caching and broadcast joins, with schema and data-quality checks.
- Built a Streamlit decision-support dashboard with a hybrid IQR and rule-based anomaly detector for temporal and geographic demand analysis.

CERTIFICATIONS

Generative AI Fundamentals — Databricks, 2026 | Software Engineer — HackerRank, 2026 | MLOps — Duke University (In Progress) | IBM AI Engineering Professional Certificate (In Progress)

LEADERSHIP

AIESEC in India — OC Vice President, Partnerships & Logistics — May 2022 – Aug 2022

Directed operations and partnerships for youth-development programs with 50+ participants; automated reporting with Python to improve data accuracy for non-technical stakeholders.
